

Microtech is by far the best DNS Service Provider we have ever used.
Having somebody on the end of the phone makes life so much easier when moving important domains.

Microtech offer fast and helpful technical support.

Intec (UK) Ltd purchase a lot of domains and have found Microtech a very cost efficient supplier when procuring in bulk.

We are currently testing their external monitoring services; this is an excellent concept which will hopefully reduce the amount of sleepless nights we have experienced with other ISP's.

Keep up the great work.

Wayne Ward (IT Manager - [Intec UK Ltd](http://www.inteonline.co.uk))
